

WHAT THE HELL?

Meaning:

Add "**the hell**" to a question to emphasise your anger or surprise.

Example

My friend would say: Where did you go last night?

My wife would say: Where **THE HELL** did you go last night?

Usage

Really easy to use, just put "**THE HELL**", directly after any wh-question-word.

|-------|-----------------|---------------|
| Who | | |
| What | | could you...? |
| Where | THE HELL | did you...? |
| When | | are you...? |
| Why | | |

Variations

THE HELL can be replaced with **IN THE HELL**. They mean exactly the same and there is no difference in strength - they are the same.

Americans often replace **HELL** with **HECK**. some say it may sound more polite (not me).

HELL can be replaced with the **F-WORD** but please don't do it, it is very strong and ugly. I point this out for two reasons:

1) When watching movies, you will often hear this and it may help your listening/understanding to know what they are saying.

2) A very common internet abbreviation is **WTF**? This means:

W hat

T he

F %ck

It is used when the writer is upset, angry or surprised at something. It is very common but don't use it, it's not cool.
